WEEDKILLERS

GALLUP BIOGRADE®

**NON HAZARDOUS
PROFESSIONAL GLYPHOSATE**

Gallup Biograde is the new formulation from the popular brand, Gallup. It is a foliar applied total herbicide for the control of annual and perennial grass and broad-leaved weeds. It can be used in many crops, for the destruction of grassland, in orchards, green cover on land not being used for production, forestry and non-crop areas.

MAPP No. 17612

Active Ingredient:
360g/L glyphosate

POND WEED INHIBITOR

REDUCES ALGAE AND SUBMERGED WEEDS

Pond Weed Inhibitor is a revolutionary way of controlling and reducing submerged weeds in ponds and lakes. It to half the light from reaching the bottom, which in turn will inhibit or halt any growth of algae. It contains a special blend of the three primary colours, red, yellow and blue so that anyone looking at the water would not know that any colour had been used.

ROUNDUP® PRO ACTIVE

CLEAN LABELLED WEED KILLER

Roundup Pro Active has excellent safety credentials and can be used for the control of annual and perennial grasses and broad-leaved weeds. It can be used in non-crop areas such as roadsides, paths, hard surfaces & aquatic areas. The new formulation has drift retardant properties and is also rainfast in 1 hour.

MAPP No. 17380

Active Ingredient:
360g/L glyphosate

FERTILISERS

AUTUMN LAWN

3-12-12 BLEND

3-12-12 is ideal for Autumn & Winter use for any grass area. From sports fields to fine lawns, this quality fast acting spreadable fertiliser offers great value for money. Having a lush and healthy lawn enables it to withstand many issues such as weeds, moss, disease & drought.

SPRING LAWN

9-7-7 BLEND

9-7-7 is ideal for spring & summer use for any grass area. From sports fields to fine lawns, this quality fast acting spreadable fertiliser offers great value for money. Having a lush and healthy lawn enables it to withstand many issues such as weeds, moss, disease & drought.

NUTRIGROW® FEED, WEED & MOSS KILLER

Compound Fertiliser with Iron. Ideal for use in lawns. Four in one; it will make lawns greener, kill a range of weeds, remove moss & fertilise the grass for a thicker and healthier looking lawn. Can be used between May and August when grass, moss and weeds are actively growing, and soil is moist.

MAPP No. 19669

Active Ingredient:
10% Nitrogen 2% Phosphate 2% Potassium
8% Iron Sulphate - dicamba mecoprop-p

Use plant protection products safely, always read the label and product information before use • Agrigem, Gem, Diamond, Nutrigrow, Premier Seed and Sapphire are registered trademarks of Agrigem UK Ltd.

GEM GRANULES

GRANULAR RESIDUAL HERBICIDE

Gem Granules is a granular residual herbicide that can be applied around trees, shrubs and ornamental plantings in order to deliver long-lasting weed control against grasses and broad-leaved weeds. It is best to apply Gem Granules between October & January when conditions are cooler. This will control many of the weeds which are present at the time and also deliver long-lasting control of germinating weeds.

Gem Granules are the standard treatment when controlling weeds around Christmas trees as it does not harm the tree and offers long lasting control. Use this product with the Gem Granule Applicator for even coverage. Gem Granules are a more cost effective alternative to the main brand, Kerb Granules.

MAPP No. 19182

Active Ingredient:
4% Propyzamide

HARDWEARING LANDSCAPE SEED

GRASS SEED FOR LANDSCAPING & LAWNS

Hardwearing landscape seed is exclusive to Agrigem and is a high quality seed for a wide variety of areas. This seed has been specifically formulated for use in landscape and lawns. It can be used to overseed bare or patchy areas, or to create a new lawn.

SEED

SALT TOLERANT MIX SEED MIX

GRASS SEED FOR COASTAL AREAS

This mix is tolerant of salt-laden winds and dry sandy conditions, helps soil stabilisation, reduces the risk of erosion and is great for use on both slopes and flat areas.

range

THE BEES KNEES 100% WILD FLOWER MIX

THE BEES KNEES 100% WILD FLOWER MIX

The Bees Knees 100% Wildflower Mix is a bee-friendly blend of UK native wildflowers and horticultural flowers for your garden. This mix includes a combination of high-colour annuals and perennials, providing colour in the first year and beyond.

Featuring a variety of colours including pink, purple, blue, yellow, white, red, and orange this mix is sure to add a burst of colour to your outdoor space.

SHERBERT FIZZ 100% WILD FLOWER MIX

Sherbert Fizz 100% Wildflower Mix is the ultimate seed mix for your garden. This unique blend of UK native wildflowers and horticultural flowers perfectly combines fast-growing and great value.

Featuring a variety of high-colour, easy-to-grow annuals, this mix is perfect for those looking to enjoy a colourful display in just one growing season. With a stunning array of colours including yellow, orange, blue, white, pink and purple.

BEES & BUTTERFLY 100% WILD FLOWER MIX

Bees & Butterfly 100% Wildflower Mix is the ultimate bee and butterfly seed mixture, a professionally selected blend of seeds that are guaranteed to attract and support bees and butterflies. With over 40 ingredients, this mixture is comprehensive and includes a variety of plants that produce large amounts of nectar and pollen, making it a magnet for bees and butterflies.

WESTLAND LANDSCAPE BARK

Westland Landscape Bark is perfect for creating low maintenance beds & borders. It reduces the need for frequent weeding and the amount of time spent on weeding. Westland Landscape Bark can also be used to create rustic natural looking pathways through woodland and large borders. Westland Landscape Bark is produced from responsible conifer plantations which are grown for the timber industry and are certified by the Forestry Stewardship Council (FSC®).

WESTLAND MANURE

Westland farmyard manure is an effective soil conditioner that enhances crop growth by proved vital nutrients. This manure is optimal for promoting healthy plant, fruit and vegetable growth. It is ideal for improving soil structure and replenishing depleted soils.

JACK'S MAGIC ALL PURPOSE

Jack's Magic All-Purpose Compost 50:50 has been updated with BIO3 a revolutionary peat alternative, resulting in not just a different appearance but also improved performance. It is the perfect compost for use all around your garden, it is ideal for seed sowing, potting, planting, and containers, giving fantastic results.

HEALTH & SAFETY

GLOVES

CHEMICAL RESISTANT SPRAYING GLOVES

When working with agrochemicals & fertilisers gloves should always be worn.

This particular type of glove has been specially designed to offer excellent protection against chemicals. It is the industry standard 330mm length and 0.38mm thick, offering you the best protection.

FIRST AID KIT

DRAPER FIRST AID KIT

A handy first aid kit supplied in a rigid plastic box ideal for travel. Keep one in your vehicle or workplace in case of minor injuries.

Contents: Waterproof plasters; bandages; sterile dressing; safety pins; cleansing wipes; vinyl gloves and first aid administration guidance leaflet.

PROFESSIONAL COVERALL

PROFESSIONAL SPRAYING OVERALLS

The type 5/6 disposable coverall is an economic solution to protect from non-hazardous liquids and dusts. It comes with an elasticated hood, cuffs and ankles and has a two way zipper with storm flap. These coveralls are category III and offer type 5/6 protection for both hazardous dusts and liquids. EN1073-2 particulate radioactive contamination. Available in sizes M, L, XL & XXL.

FACE SHIELD

PROTECTION WHILST SPRAYING

When using pesticide products it is important you wear a face shield to protect your eyes, mouth and face from any splash back or spray drift. It is a well built, durable, lightweight visor with padded headband and single point ratchet for maximum safety and comfort. It is made from a scratch-resistant plastic visor to ensure you can clearly see small details such as product labels. It conforms to EN166, the standard requirement for COSHH assessments.

EYE WASH STATION

PORTABLE KIT

A simple eyewash station capable of holding two 500ml Reliwash Eyewash bottles vertically. The dome lid has a dual use, in addition to acting as a dust cover, the lid may also be used as a receptacle for eye wash fluid, held under the chin to prevent clothes from becoming wet.

BLUE NITRILE GLOVES

BLUE NITRILE GLOVES

DISPOSABLE GLOVES FOR GENERAL USE

Blue Nitrile Gloves are disposable gloves for general use with textured fingers for excellent grip. These comfortable, thick and flexible gloves are approximately 33% thicker than standard nitrile gloves making them ideal for mechanics and farmers.

CHEMICAL SPILL KIT

Introducing our Mini Single-Use Spill Kit, the ultimate solution for on-the-go spill containment in a compact, sealed bag. Designed with convenience in mind, this spill kit is perfect for any vehicle or chemical store, offering quick and efficient clean-up for unexpected spills. With the capacity to absorb up to 20 litres, you can trust this kit to tackle spills of various sizes effectively.

Need help controlling ants?

Imidasect Ant Gel

- Highly effective formulation to attract and control Pharaoh ants, Black ants and Argentine ants.
- Foraging ants will feed on the bait and then return to the nest, transferring the bait to the queen and the entire colony.

Bait Bunker

A unique, discreet and highly effective gel bait station for ants and other crawling insects.

- Insect gel baits can be applied through the hole in the lid for quick and easily application.
- The bait station is designed to keep gel secure and out of reach from non-target species.

Maxforce Pushbox

Ready to use insecticidal ant bait station, for the rapid control of a variety of ants.

- Suitable for use indoors and outdoors.
- The Maxforce Quantum formulation is highly palatable.
- Tried and tested against the control of all major ants species.
- Convenient, discreet, long term control.

Gel Bait Gun

Affordable, high-quality Gel Bait Gun for the application of syringe-style baits.

- Suitable for Goliath Gel, Quantum Gel, Imidasect, Maxforce Gel Baits, and many more.
- Easy-to-use with a robust design.

Use insecticides with precaution. Before use, read the label.

Non-Toxic Fly & Wasp Control

Fly Traps

A low-cost, non-toxic, simple-to-use and chemical-free method of controlling flies which is effective for up to 12 weeks. Simply pour in the powered bait and fill the bag with 1ltr of luke-warm water. Hang the trap outdoors in an area with infestation and once the bag is full the contents can be disposed of onto a compost heap or into general waste. Each bag has the capacity for 20,000 flies.

Wasp Traps

Are to be used in conjunction with Wasp Lure, simply fill the bags with 500ml of wasp lure and hang in an area with infestation, once the bag is full the contents can be disposed of into general waste.

Wasp Lure

Available in 1ltr and 5ltr containers. Wasp Lure is a ready to use powerful attractant for wasps, its non-toxic and safe to use in areas where children and pets maybe present.

Sapphire[®] PRO

A multi surface biocide for cleaning hard surfaces

Sapphire[®] Pro is a plant origin biocide that delivers curative algaecidal effects on outdoor buildings and building materials, on all hard surfaces (porous & non porous), in green spaces, and on every roof type (except thatched).

Sapphire[®] Pro gives fast long lasting results which, in ideal conditions, can be visible a few hours after treatment. **Sapphire[®] Pro** can be used throughout the year on all approved surfaces. The water required for diluting **Sapphire[®] Pro** is very much lower than many biocidal treatments, making **Sapphire[®] Pro** easy to use and a cost effective option. After dilution, 1 litre of **Sapphire[®] Pro** will cover 550m². **Sapphire[®] Pro** has no re-entry restrictions on the label and is approved for use in organic systems.

Active Ingredient: 500g/L nonanoic acid

- **New plant origin active**
- **Fast acting and reliable results**
- **Approved for use in organic systems**
- **Safe to use on a wide range of surfaces**

Untreated

A few hours after treatment

1 month after treatment

Please read the label before use and follow instructions • Sapphire[®] Pro contains nonanoic acid and is a registered trademark of Certis Belchim BV.

PA1 and PA6A Training Course

Dates: (Times and dates to be confirmed)

Course Criteria:

Each course will be carried out for multiples of 8no. operatives. If this can't be met by a single park, Agrigem can assist with creating a course using multiple parks or other operatives from our customer portfolio.

Course Programme:

Day One - PA1

Day Two - PA1 Revision, PA1 Online Assessment
Start PA6A

Day Three - PA6A

Assessments:

PA1 - Online Assessment held on site on day two of the training course. 33 Multiple choice questions to be completed in one hour.

PA6A - The Practical assessment is approximately two hours, carried out by an NPTC Assessor on a one-to-one Basis.

Course Pre-requisites and Equipment required to bring to the training:

PA1 - Pen, Lunch, Photographic Identification for the assessment e.g., **Passport, Driving Licence, gloves for the online assessment.**

PA6A - Appropriate Personal Protective Equipment (PPE), Coveralls, Rubber Boots, Gloves, Face shield, (Please see PPE Package if required), Measuring jug, Tape Measure (30m), Markers, Calculator, Knapsack Sprayer (Clean and serviceable) Knapsack sprayers will be available for training, you are required to have your own sprayer for the assessment. Appropriate outdoor clothing (Training still takes place in all weather conditions).

Course Content PA1:

- Know the legislative requirements and codes of practice relating to the use of pesticides
- Understand the relevance of product information.
- Know how to minimise the risk of human contamination and implement emergency procedures
- Know how to store and transport pesticides safely.
- Know how to manage and dispose of surplus pesticide and waste materials.
- Know the record keeping requirements.
- Know how to minimise the risk of environmental contamination and implement emergency procedures.

PA6A:

- Know the legislative and safety regulations relating to applicator use.
- Be able to assess the environmental factors relating to mixing and application.
- Be able to read and interpret product information.
- Be able to prepare and calibrate a hand-held pedestrian applicator.
- Be able to operate the application equipment.
- Know how to carry out post-operational procedures.

PA1 - <https://www.nptc.org.uk/assets/documents/ee2499867db446fba35f0d2eacd38031.pdf>

PA6A - <https://www.nptc.org.uk/assets/>

As many operatives are new to the industry, they don't necessarily have the correct equipment and PPE to carry out the training, we have therefore put together a package which can be delivered to site prior to the training taking place, which consists of everything required for the training, and grounds maintenance works when back on site.

The package includes the following products:

- Matabi Evolution 16ltr Knapsack
- Chemical Spill Kit
- 2no. 1050mm x 750mm Spraying in Progress Signs.
- Coveralls x 2
- Full Length Wellington Boots (please confirm size when ordering)
- Chemical Resistant Spray Gloves
- Faceshield
- 50m Tape Measure
- Measuring Jug
- Bucket
- Calculator, Pen, Note Pad

EQUIPMENT

PROFESSIONAL SPREADER

ALL-ROUND BROADCAST SPREADER

This all-round broadcast spreader has a polypropylene hopper which sits on a black powder coated frame with pneumatic tyres, enclosed gearing, folding handle and multiple feed setting control with a maximum spreading width of 3m. It is suitable for spreading lawn fertiliser, lawn sand and seed.

It also has a 23kg capacity hopper with adjustable flow rate.

BERTHOUD® VERMOREL 1800

PROFESSIONAL USER 16L KNAPSACK SPRAYER

The Vermorel Pro Comfort 1800 sprayer is suitable for the application of herbicides, fungicides and insecticides. This comfortable and efficient sprayer has been designed with the operator in mind and is fitted with padded straps and waist belt assembly that is unique to Berthoud Sprayers.

GAMBERINI TRAILED SPREADER FC 200

The Gamberini range of spreaders are exclusive to Agrigem and were chosen for their high quality rugged construction. The spreaders are designed & built by a family business in Italy with a huge focus on delivering a high quality, operator friendly machine that will last for years. Whether you are a professional user or amateur small holder, this machine will meet your needs. These machines are at a different price point to other inferior spreaders that are available but they are not comparable.

ATV TOWABLE 80KG SPREADER

TOWABLE ATV SPREADER

This durable spreader is ideal for spreading granules such as fertiliser and grass seed on paddocks and larger lawned areas. It features an 80kg capacity with an adjustable feed control to spread over a width of 10-12ft. This spreader cannot be used with Rock Salt but can be used with refined ice melting salt.

BERTHOUD® ELYTE 8L PUMP SPRAYER

8 LITRE PROFESSIONAL COMPRESSION SPRAYER

The Berthoud Pro Elyte 8L sprayer is the market leader when it comes to hand-held compression sprayers. This sprayer is designed in medium sized gardens, or for professional users who prefer the ease of a handheld sprayer when compared to a knapsack.

MATABI® EVOLUTION 16

16L KNAPSACK SPRAYER

The Matabi Sprayer Evolution 16 has a 16 Litre capacity with a fibreglass lance measuring 0.95m. It includes adjustable padded straps making it comfy for the user to operate - ideal for when a large amount of spraying is required. The knapsack features a chrome steel handle as well as a translucent gage on the side to easily keep track of the amount of liquid in the tank.

MATABI EVOLUTION 30

30L ELECTRIC SPRAYER

This 30ltr capacity electric garden sprayer is suitable for use with weedkillers, fungicides, insecticides / pesticides, fertilisers, moss killers, and products of natural origin.

Easy to use and transport, this garden sprayer comes complete with 4 high flow nozzles designed to reduce drift and increase efficiency, 8 metres of reinforced hose, a high-performance 18v electric pump and electronic control to allow for consistent spraying.
