# FERTILISERS

## AUTUMN TURF PRO 3-12-12 COMPOUND

### KEY BENEFITS:

- 6 weeks longevity.
- Turf response is seen within 7 days.
- Granule dispersal takes on average 4-5 days.
- Ideal balance of NPK to strengthen turf.
- High phosphate and potash levels to encourage harder growth and better root development.
- Compound granules provide ease of application and an even distribution of nutrients.
- Ensures even growth, quality and colour over the whole area and prevents the unsightly specking effects.
- Versatile application rates as low as 35g/m<sup>2</sup> enabling one bag to cover 600m<sup>2</sup> making Autumn Turf Pro very economical.

20kg

## SPRING / SUMMER PRO 9-7-7 COMPOUND

### KEY BENEFITS:

- 6 weeks longevity.
- Turf response is seen within 7 days.
- Granule dispersal takes on average 4-5 days.
- Ideal balance of NPK to strengthen turf.
- Granules provide ease of application and an even distribution.
- Releases slowly over a 6 week period- avoids rapid top-growth.
- Ensures even growth, quality and colour over the whole area and prevents the unsightly specking effects.
- Versatile application rates, as low as 35g/sq.m enabling one bag to cover 570sq.m making them very economical.

20kg

## CRF 20-0-15+2Mg+5Ca

### KEY BENEFITS:

- Controlled release fertiliser.
- NPK content of 20-0-15.
- Release nutrients for 4-6 months.
- Trace elements 2% Mg & 5% Ca

20kg

## PHASED RELEASE 18-3.5-8+1Mg

### KEY BENEFITS:

- Suitable for use on lawns, paddocks, pasture, sports turf and trees and ornamentals.
- Active ingredients released over a 12-16 week period.
- Avoids rapid growth and scorching.
- Mini-granular compound formulation provides excellent spreading pattern.

20kg

## PRE-SEEDER 6-9-6

### KEY BENEFITS:

- Ideal for use on areas before or after seeding.
- Mini-granule compound.
- Formulated with low (but still effective) levels of nutrients in order to avoid scorch on young grass.

20kg

# PLAZMA<sup>®</sup>

## TURF DISEASE CONTROL

**PLAZMA** is a powerful, high performance, broad spectrum fungicide for the control of disease in managed amenity turf. It contains 250g per litre of the active ingredient Azoxystrobin, making it one of the strongest, broad spectrum professional turf fungicides on the market.

Azoxystrobin is known to target a wide variety of turf diseases including fusarium patch, take-all patch, brown patch, leaf spot, rust diseases, fairy rings and anthracnose.

### Key Features

Easy to use liquid formulation; can be used in boom sprayer or knapsack

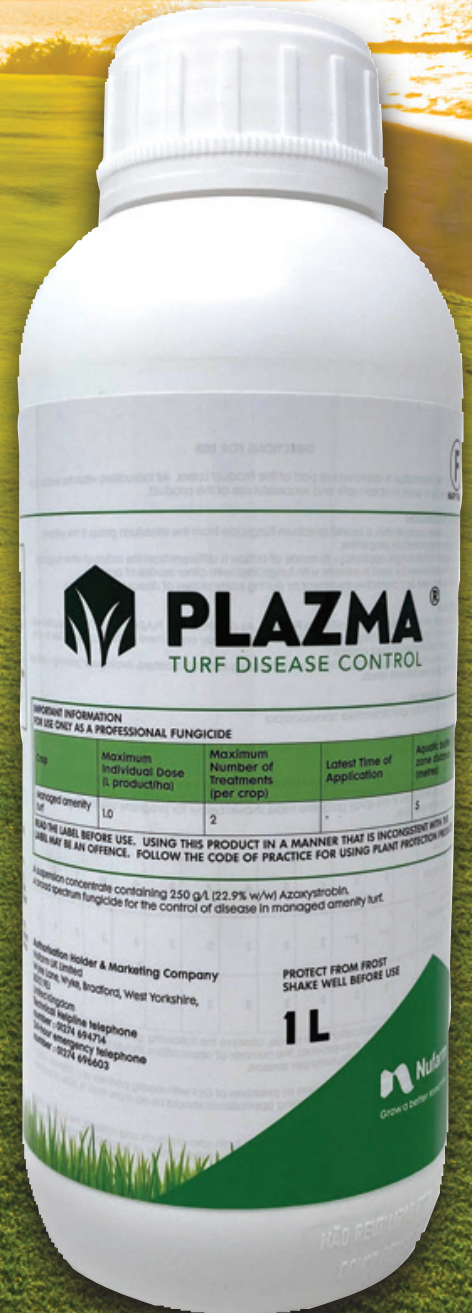

Ideal in high humidity conditions

Fast acting & long lasting with rainfast properties.

1L convenient pack size

250g per litre Azoxystrobin

Manufactured by Nufarm, a leading manufacturer of crop protection products for the last 100 years.

## Acelepryn

Acelepryn is an insecticide for the control of chafer grubs and leatherjackets in managed amenity turf.

Acelepryn has been fully approved and will be available in time for the key chafer grub application timing in late spring, and to target leatherjackets in the autumn.

The approved label now covers the control of chafer grubs and leatherjackets in sports pitches, golf courses, racecourses, bowling greens, airfields, and professional application to commercial and residential lawns.

Acelepryn contains: 200 g/l chlorantraniliprole  
MAPP No. 20149

600 ml 3L

## Primo Maxx II

Primo Maxx® is a plant growth regulator for management of amenity turf areas such as parks, golf course fairways, tees and greens, sports fields, cemeteries and turf farms. Primo Maxx® works by restricting the growth of the grass which in turn reduces the frequency of mowing and the volume of grass clippings. This can be especially useful in difficult areas such as sloping banks.

Primo Maxx® works by causing a temporary halt in the production of gibberellic acid, a plant hormone responsible for promoting top growth in grasses.

Acelepryn contains: 116.4g/L trinexapac-ethyl  
MAPP No. 17509

5L

## Instrata Elite

Instrata Elite replaces the popular 'Instrata' and delivers even more control whilst reducing its application rate by two thirds. A broad spectrum foliar fungicide, Instrata Elite combines difenoconazole and fludioxonil with both contact and systemic properties.

Instrata Elite is used for the control of fusarium patch, dollar spot, brown patch and also offers moderate control of anthracnose on managed amenity turf.

Acelepryn contains: 80.3 g/l fludioxonil, 80.3 g/l difenoconazole • MAPP No. 17976

3L

## Ascerinity

Ascerinity is the ideal fungicide solution for enclosed professional sports turf, providing unparalleled protection against a wide range of fungal infections. Its innovative balanced-systemic formula ensures reliable sustained disease control, making it the perfect choice for maintaining the health and appearance of sports fields.

Acelepryn contains: 23.6 g/l benzovindiflupyr and 78.8 g/l difenoconazole • MAPP No. 19544

3L

## Medallion TL

Medallion is a new and fast-acting fungicide that has been formulated for high level of control on turf diseases that include fusarium patch, leaf spot and anthracnose. Medallion works very quickly and gives long lasting protection during the cooler months typically autumn to spring. The active ingredient Fludioxonil works by directly targeting disease pathogens that are present on the grass leaf, or the thatch and soil. It destroys the cell walls and the threat of disease pathogens.

Acelepryn contains: 125g/l fludioxonil  
MAPP No. 15287

3L

## Dedicate

Dedicate is a contact systemic turf fungicide which is highly effective. Dedicate is rapid acting with results within two weeks of application, is long-lasting and can be used all year round with up to 4 applications a year. It both prevents and cures fusarium patch (*Microdochium nivale*), red thread (*Laetisaria fuciformis*), dollar spot (*Sclerotinia homoeocarpa*), anthracnose (*Colletotrichum graminicola*) and rust (*Puccinia cynodontis*) for use in managed amenity turf.

Acelepryn contains: 200g/L tebuconazole & 100g/L trifloxystrobin • MAPP No. 17003

250 ml

Use plant protection products safely. Always read the label and product information before use.

# SWORD

## LINE MARKING PAINTS

### EXO

#### EXO BENEFITS:

- Ready to use. Designed to be used neat.
- Suitable for use on grassed areas.
- For use in a wheel to wheel marker.
- Biodegradable and environmentally friendly.

### APEX

#### APEX BENEFITS:

- Formulated for use on grass.
- Bright & colourful lines.
- Excellent weather resistance.
- Fast drying.
- Ready to use - no dilution necessary.

### BLAZE

#### BLAZE BENEFITS:

- A concentrate.
- Initial marking - mix in ratio 1 part paint with up to 3 parts water.
- Over marking - mix in ratio 1 part paint with up to 7 parts water.
- These dilution rates can be varied according to ground and weather conditions.

### QUARTZ

#### QUARTZ BENEFITS:

- A concentrate line marking paint.
- Initial marking - 1 part paint with up to 5 parts water.
- Over-marking - 1 part paint with up to 10 parts water.
- These dilution ratios can be varied according to ground and weather conditions.

# PREMIER SEED®

## BOWL & GOLF GREEN GRASS SEED

### KEY BENEFITS:

- Will produce an exceptional high-quality and fine-leaved lawn.
- Tolerates mowing down to 5mm.
- Produces a compact tight turf sward.
- The tight sward and shoot density give an excellent resistance to disease.

## CRICKET WICKET GRASS SEED

### KEY BENEFITS:

- Quick to establish.
- High shoot density for a true playing surface.
- Suitable for cricket squares and tennis courts.
- A uniform, consistent surface under close mowing.

## SPORTS PITCH GRASS SEED

### KEY BENEFITS:

- Suitable for a wide variety of sport pitches with high volumes of traffic.
- Contains ryegrass.
- Available in several pack sizes to suit your area.

## FINE CUT SPORTS TURF SEED

### KEY BENEFITS:

- Ideal for tennis courts and cricket outfield.
- Produces a fine leaved, dense sward.

 **Will produce an exceptional high-quality and fine-leaved pitch.**

 **Produces a compact tight turf sward.**

 **Extremely hard wearing and quick to recover.**

 **The tight sward and shoot density give an excellent resistance to disease.**

# Sapphire<sup>®</sup> PRO

**Sapphire<sup>®</sup> PRO**

An emulsifiable concentrate (EC) containing 500 g/L (53.97% w/w) nonanoic acid  
Curative, algacide effects on outdoor buildings and building materials, on all hard surfaces (porous and non-porous) in green spaces, on every roof type (except thatched roof).

**HARD SURFACE BIOCIDES**

**INSTRUCTIONS FOR USE**  
SAPPHIRE<sup>®</sup> PRO can be used on most building materials, pavements, paving blocks, steel, zinc, aluminium, tiles, bitumen, exterior wood, plastic/glass of greenhouse walls (outside), stones, non-grassed sports courses such as athletic tracks.  
Do not apply to synthetic resin, copper, lead or thatched roof surfaces.  
For zinc, aluminium, stainless steel, steel: if a thin white layer persists 14 days after treatment, rinse with clean water.  
For any other materials than those listed above (including limestone), perform a test on a non-visible corner before extending the application to the entire surface.  
Respect the dose of product per square metre, especially on painted surfaces (e.g. plaster). After each treatment, clean the spray equipment by rinsing with water.  
• Avoid direct or indirect contact with food and feed.  
• Always read the label or leaflet before use and follow all the instructions provided.

The diluted solution should be used immediately.  
• Only apply this product with a hand-held manually operated low pressure (2 bar or below) device preferably in combination with a spraying shield.  
• Agitate during application.  
• Do not treat in rainy weather or on frozen surfaces.  
• Do not clean the surface after treatment.  
• Allow the product to take effect for at least several days.  
• Users should report ineffective treatment to the registration holder.

**RISK MITIGATION MEASURES**  
• Product can only be used if the weather forecast shows no rain for the day of application.  
• During application, the soil and plants adjacent to the treated area should be protected.

**FOR PROFESSIONAL USE ONLY**

Authorisation number:  
GB-2020-1248-0003 / NI-2020-1248-0003

**5 Litres e** Read instructions before use

**1 x 5 L Sapphire** in 100L of water  
**OR**  
**1 x 1 L Sapphire Pro** in 16 L of water

# Abzorb Triple Action Wetting Agent

**Abzorb** is an excellent wetting agent derived from surfactants with a very low environmental impact.

**Abzorb** assists the rapid penetration of water in dry areas for medium to long term re-wetting.

This fast acting wetting agent attaches itself to the waxes and lipids left by fungal spores on soil and sand particles which in turn attracts water molecules allowing hydrophobic areas to be re-wet. **Abzorb** contains a blend of soil penetrating surfactants, that help to re-wet dry areas of turf affected by dry patches and fairy ring.

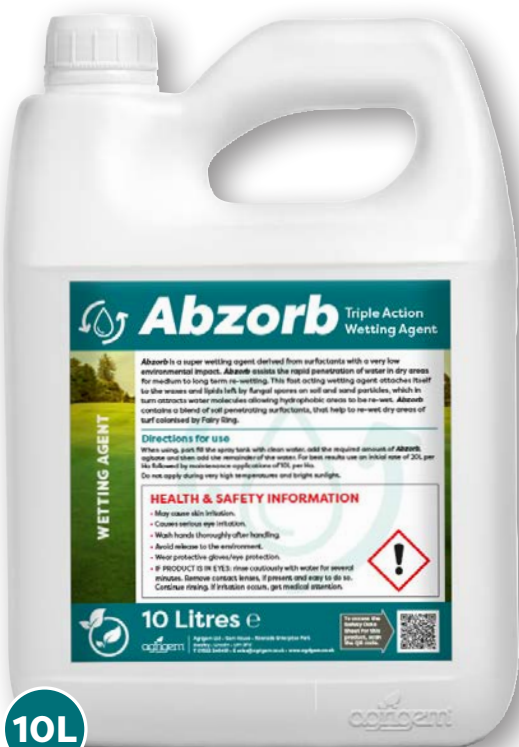

## Key Benefits

- **Triple action: Re-wetting, retention and encouraging excess water drainage.**
- **Low environmental impact.**
- **Contains a blend of soil penetrating surfactants.**
- **Effective against dry patch and fairy ring.**
- **Ideal for use on amenity turf, lawns and sports turf.**

2.5kg

**Abzorb** is an effervescent tablet form with added Seaweed Extract. This concentrated wetting agent is easy to use. Simply take the tablet out of its packaging and place in the irrigation tank system to ensure an even application to the turf. Helps eradicate dry patches and also aids the green-up of turf with the seaweed extract.

# Emerald<sup>®</sup> PRO

## ORGANIC & NATURAL SEAWEED FERTILISER HELPING TURF RECOVER FROM DROUGHT

### Key Benefits

- Improves quality and yield of crops.
- Aids recovery of crop after periods of stress.
- Contains a wide range of nutrients, vitamins and amino acids.
- Approved for use on amenity turf, ornamentals, glasshouse crops, soft fruit, cut flowers and salads.

1L

5L

### Trace-EL

- Foliar applied fertiliser- starts working immediately.
- Increases both quality and yield in plants and crops.
- Approved for use on fine turf, lawns, paddocks, fruit crops, vegetables and ornamental plants.
- Can be used from March to October.

### Nutri-gem

- Fully water soluble.
- Provides stress relief to targeted plants.
- Faster response time compared to granular fertilisers.
- Compatible with most herbicides / pesticides.
- High quality formulation containing macro and chelated micro elements.

### Phyter

- Increases the target plant's ability to absorb nutrients.
- Suitable for use on all crops.
- Contains a readily available version of phosphate, phosphite, which can be absorbed much quicker.
