

Sapphire®

Contains: Didecyl dimethyl ammonium chloride 112.5 g/L

Professional Hard Surface Biocide For The Removal Of Mould & Algae From All External Hard Surfaces

DIRECTIONS FOR USE

Sapphire® is a professional biocide for the use on external hard surfaces including: roofs, driveways, pavements, concrete, around buildings and on artificial sports surfaces such as tennis courts to control moulds, fungi and algae.

Sapphire® is ideally applied as a spray. It can also be applied by brush or mop. It is essential that all areas to be cleaned are thoroughly wetted with the product.

Sapphire® works on contact and continues to work for 5 to 7 days after application. In some instances a second treatment may be necessary. All surfaces may be used after application has dried.

A new solution of **Sapphire®** should be made up daily.

- **Statutory conditions relating to use**
- FOR USE ONLY BY PROFESSIONAL OPERATORS FOR USE ONLY AS A SURFACE BIOCIDE

Application rate:

- Dilute 1 Litre of Sapphire to 20L with water and apply to 100m²

Users must comply in full with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval.
