APPLICATION RATE: Can be used at all times of the year in dry weather, preferably at temperatures above 5°C and when no rain is expected in the following 24 hours. Any excess growth can be removed manually prior to use. Ensure that the surface to be treated is dry.

NORMAL GROWTH: Dilute 50ml of product with 1 litre of water, then apply to 5m² of surface.

HEAVY GROWTH: Dilute 100ml of product with 1 litre of water. Apply 1 litre of diluted product per 5m² of surface.

APPLICATION METHOD: Can be applied by brush, mop and ideally by surface spray. It is essential that all areas to be cleaned are thoroughly wetted with this product. N-Virol Algae & Lichen Killer works on contact and will kill mould and other growths within typically 2-4 days and the secondary detergent action will help to gently clean the treated surface in the following weeks and months. In some instances a second treatment may be necessary. For full directions refer to the technical Data sheet for N-Virol Algae & Lichen Killer.

DANGER: Wash hands and exposed skin thoroughly after handling. Avoid release to the environment. Wear eye protection/protective gloves/protective clothing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor. Dispose of contents/container in accordance with local regulation

HEALTH AND SAFETY: Information on the health and safety of the product is available from our N-VIROL Technical Department in the form of material safety data sheet.
