

Gem[®] granules

SHAKER POT

Gem[®] granules is a pre or post emergence residual herbicide that provides long-term residual control of annual and perennial grasses and a wide range of other weeds.

Gem[®] granules are especially useful for the control of weed growth around trees, shrubs and roses, along fence lines, hedge lines and walls, where mowing can be difficult.

570g is sufficient to treat 150m².

570g is sufficient to treat 150 trees.

Fill the beaker to the required level, hold horizontally and shake in a "W" pattern.

Practice application before use.

Test distribution on 1 square metre.

Refer to label for recommendation for use.

**ALWAYS READ THE LABEL.
USE PESTICIDES SAFELY.**
